To identify the component causing the defect, compare your print sample against the measurements shown.

To diagnose a defect on the transfer belt:

1. Print eight Letter/A4-size pages long-edge feed. Verify that the same defect appears on every fourth page.

Or

2. Print four Tabloid/A3-size pages. Verify that the same defect appears on every other page.

Call for service for this defect.

Defectos recurrentes

The first part of the document discusses the importance of maintaining accurate records of all transactions. It emphasizes that every entry, no matter how small, should be recorded to ensure the integrity of the financial data. This includes not only sales and purchases but also expenses, income, and any other financial activity. The text explains that proper record-keeping is essential for identifying trends, managing cash flow, and preparing for tax obligations.

Next, the document addresses the need for regular reconciliation. It states that comparing the company's internal records with bank statements and other external sources is crucial for catching errors early. This process helps to identify discrepancies, such as missing transactions or incorrect amounts, and allows for prompt correction. Regular reconciliation also provides a clear picture of the company's current financial position and helps to prevent fraud or mismanagement.

The document then discusses the importance of budgeting and forecasting. It explains that setting a budget allows a company to plan its future financial needs and allocate resources effectively. By forecasting income and expenses, management can anticipate potential challenges and make informed decisions to avoid them. The text also notes that budgeting is a key tool for measuring performance and staying on track with financial goals.

Finally, the document emphasizes the importance of transparency and communication. It states that all financial information should be shared with relevant stakeholders, including management, investors, and tax authorities. Clear communication helps to build trust and ensures that everyone is working with the same information. The document also notes that maintaining accurate records and providing regular reports are essential for demonstrating the company's financial health and performance.

Défauts récurrents

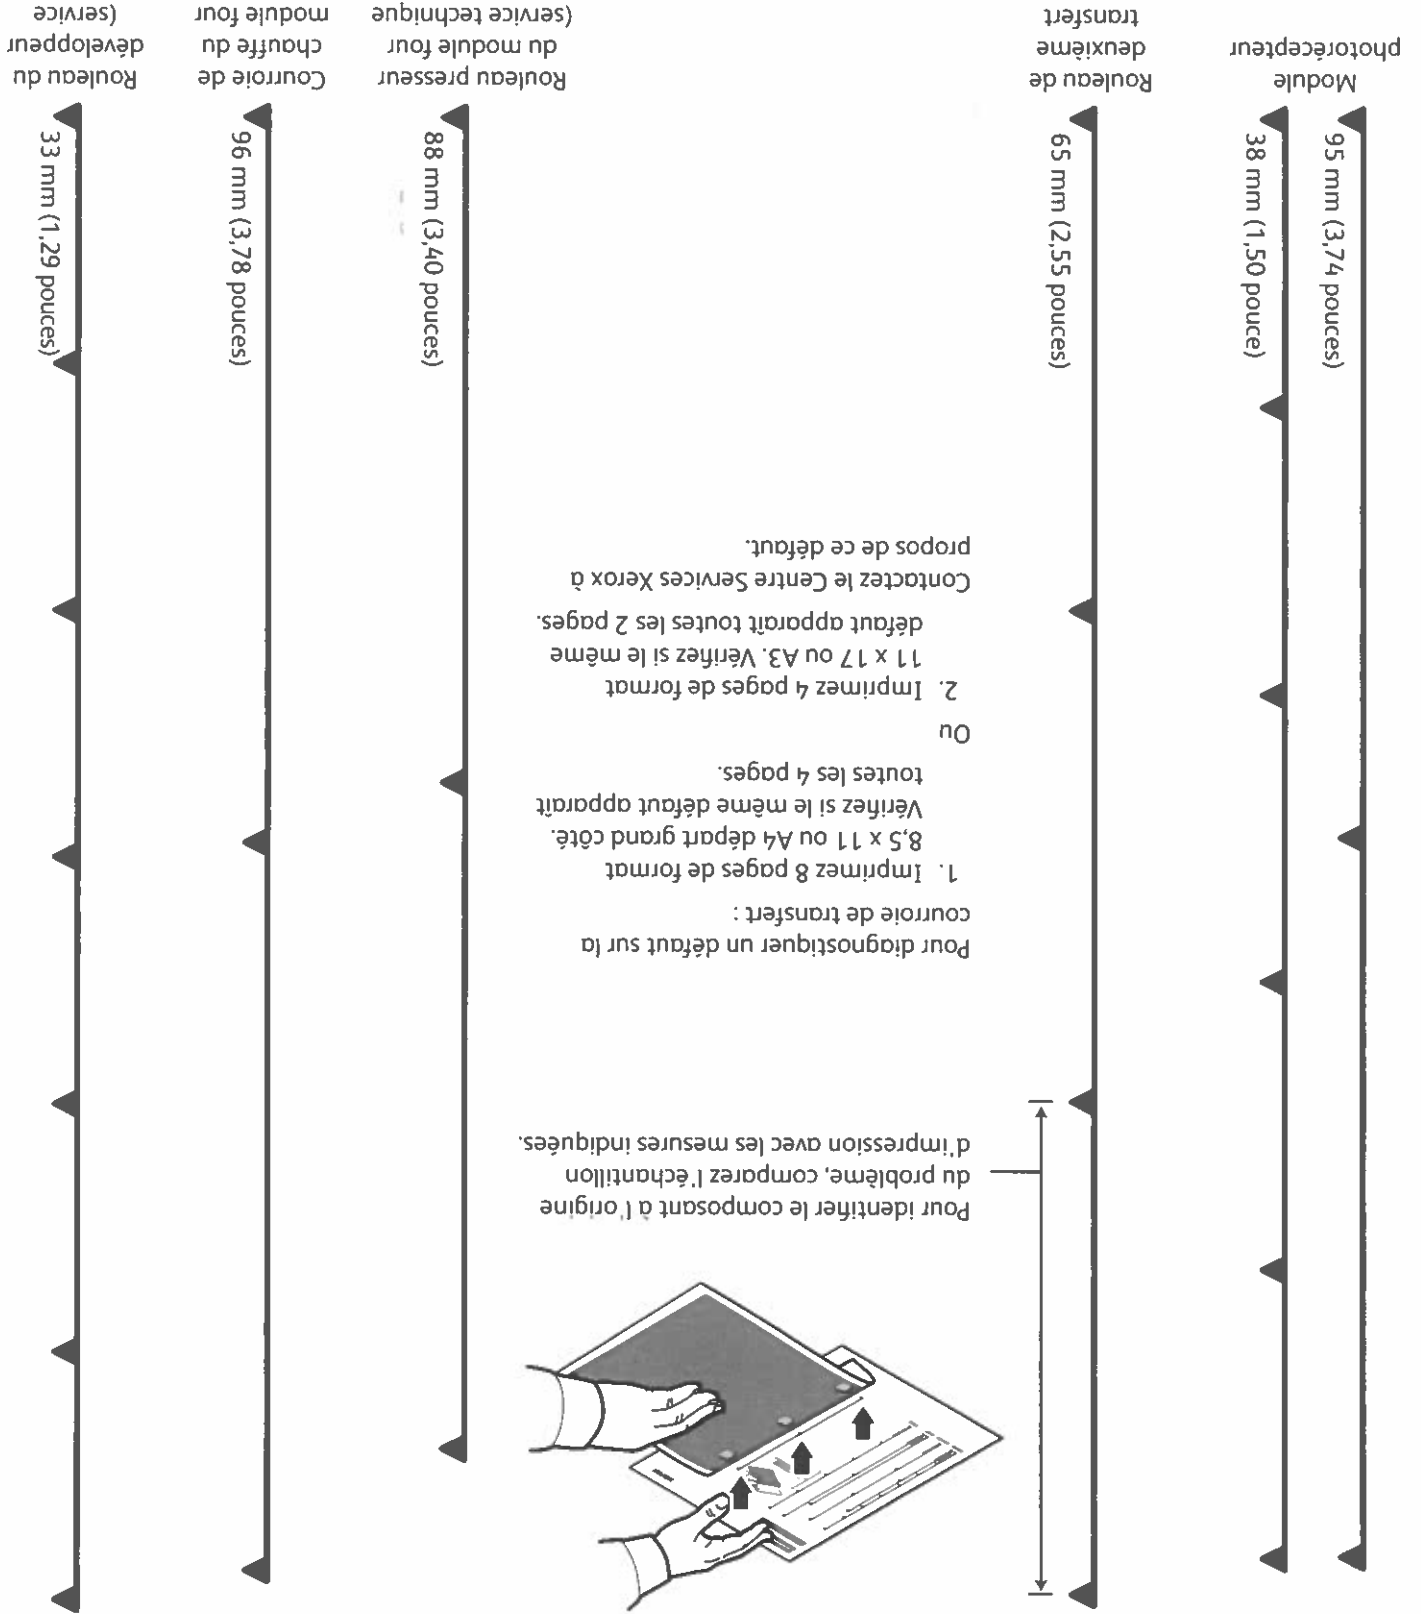

Pour identifier le composant à l'origine du problème, comparez l'échantillon d'impression avec les mesures indiquées.

Pour diagnostiquer un défaut sur la courroie de transfert :

1. Imprimez 8 pages de format 8,5 x 11 ou A4 départ grand côté. Vérifiez si le même défaut apparaît toutes les 4 pages.

Ou

2. Imprimez 4 pages de format 11 x 17 ou A3. Vérifiez si le même défaut apparaît toutes les 2 pages. Contactez le Centre Services Xerox à propos de ce défaut.

Difetti ripetuti

Per identificare il componente responsabile del difetto, confrontare il campione di stampa con le misure mostrate.

Per diagnosticare un difetto sulla cinghia di trasferimento:

1. Stampare otto pagine in un formato Letter/A4 con alimentazione lato lungo. Verificare che lo stesso difetto venga visualizzato su ogni quarta pagina.

Oppure

2. Stampare quattro pagine con formato Tabloid/A3. Verificare che lo stesso difetto venga visualizzato su pagine alterne.

Richiedere assistenza per questo difetto.

Falhas recorrentes

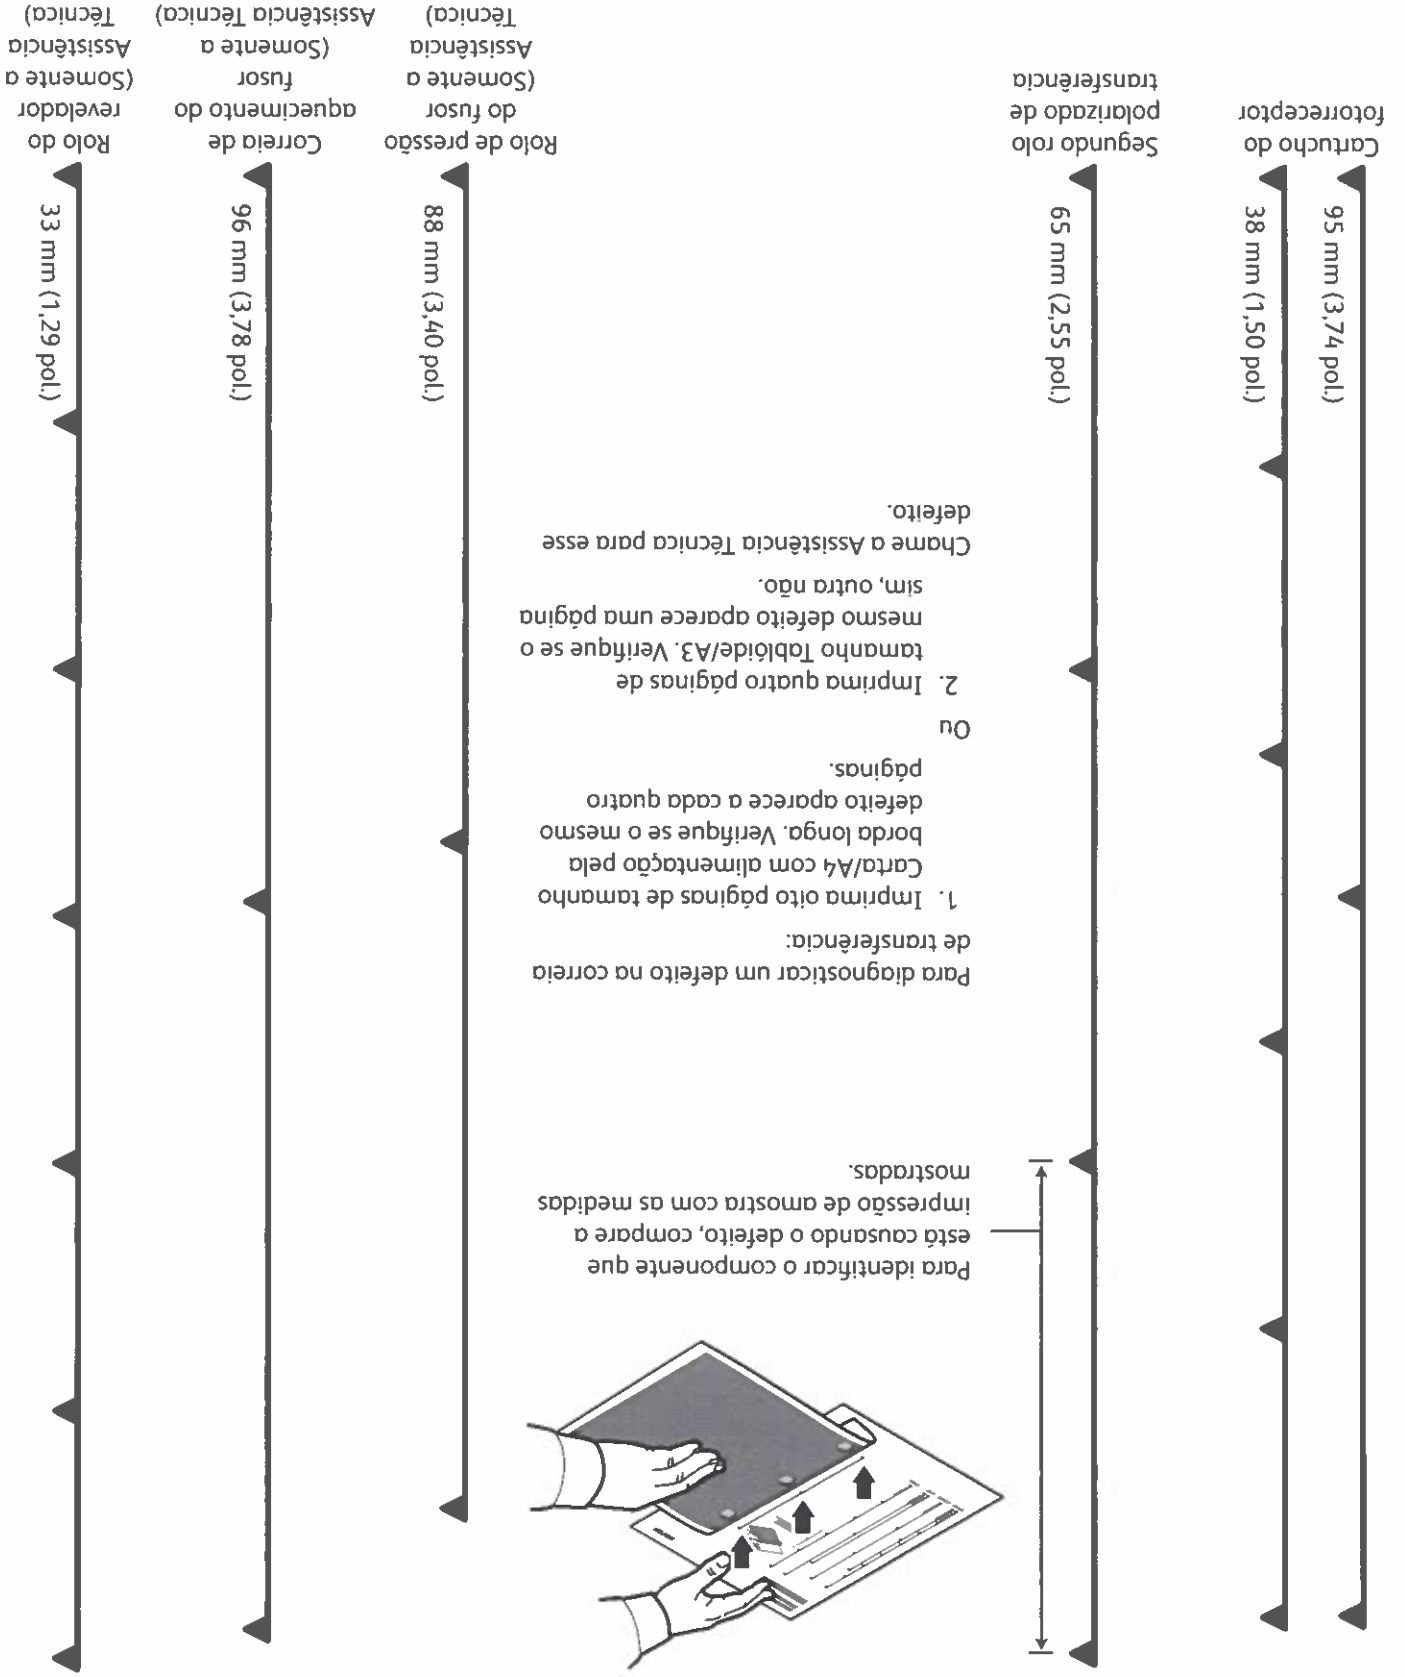

Para identificar o componente que está causando o defeito, compare a impressão de amostra com as medidas mostradas.

Para diagnosticar um defeito na correia de transferência:

1. Imprima oito páginas de tamanho Carta/A4 com alimentação pela borda longa. Verifique se o mesmo defeito aparece a cada quatro páginas.
2. Imprima quatro páginas de tamanho Tablóide/A3. Verifique se o mesmo defeito aparece uma página sim, outra não.

Chame a Assistência Técnica para esse defeito.

(Latin Portuguese)

the 1990s, the number of people in the world who are undernourished has increased from 600 million to 800 million (FAO 2001).

There are a number of reasons for this increase. First, the world population has increased from 5 billion in 1987 to 6 billion in 2000, and is projected to reach 9 billion by 2050 (UN 2000). Second, the world population is becoming increasingly urbanized, and this is increasing the demand for food. Third, the world population is becoming increasingly aged, and this is increasing the demand for food.

There are a number of reasons for the increase in the number of people who are undernourished. First, the world population is increasing, and this is increasing the demand for food. Second, the world population is becoming increasingly urbanized, and this is increasing the demand for food. Third, the world population is becoming increasingly aged, and this is increasing the demand for food.

Повторяющиеся дефекты

Чтобы идентифицировать компонент, вызывающий дефект, сравните свой образец с указанными результатами измерений.

Диагностика дефекта на ремне переноса:

1. Распечатайте 8 страниц формата F4/Letter с подачей длиной кромкой. Убедитесь, что один и тоже дефект повторяется на каждой 4-й странице.

или
2. Распечатайте 4 страницы формата F3/Tabloid. Убедитесь, что один и тоже дефект повторяется на каждой 2-й странице.

Для устранения этого дефекта необходимо обратиться в сервисную службу.
