Faxing

You can send a fax in one of four ways:

- **Fax** scans the document then sends it directly to a fax machine.
- **Server Fax** scans the document then sends it to a fax server, which transmits the document to a fax machine.
- **Internet Fax** scans the document then emails it to a recipient.
- **LAN Fax** sends the current print job as a fax.

For details, refer to the *User Guide*. For details about LAN Fax, refer to the print driver software. For details about fax setup and advanced settings, refer to the *System Administrator Guide*.
